Dashboard Tile: Program Statistic - Lifetime Budget, Obligated, Awarded, Disbursed

Last Modified on 09/25/2025 11:44 am EDT

For DevResults sites that use the **Budget** feature (as opposed to the **Finance** feature), additional options are available for the **Program Statistic** dashboard tile. These options let you display top-line financial numbers, including: **Lifetime Budget**, **Obligated**, **Awarded**, and **Disbursed**.

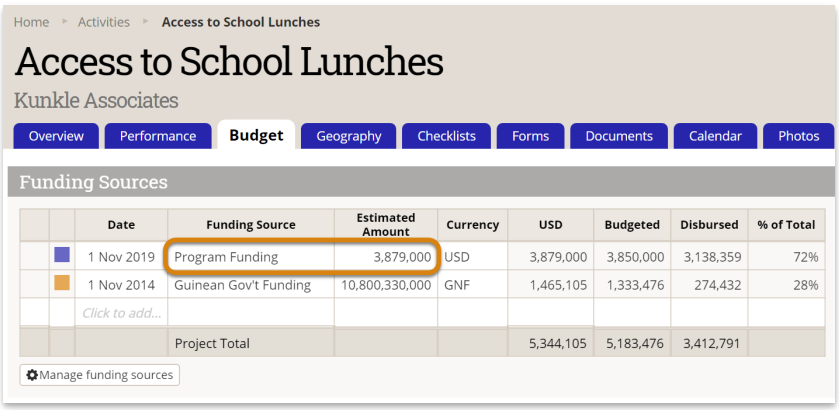

Note: Users with permission to view/edit Program Settings can go to **Administration > Program Settings** to see or change which financial feature is enabled.

Obligated

This **Obligated** program statistic tile is calculated from each **Project Budget** page.

It sums the **Estimated Amount** column in the **Funding Sources** section, for every funding source marked as **own funding**.

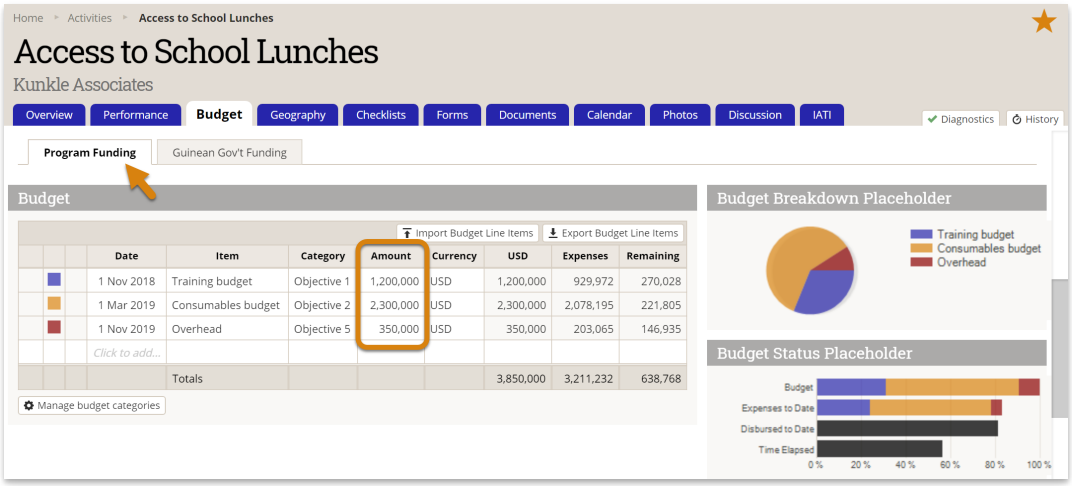

Awarded

This **Awarded** program statistic tile is calculated from each **Project Budget** page.

It sums the **Amount** column in the **Budget** section, for every funding source marked as **own funding**.

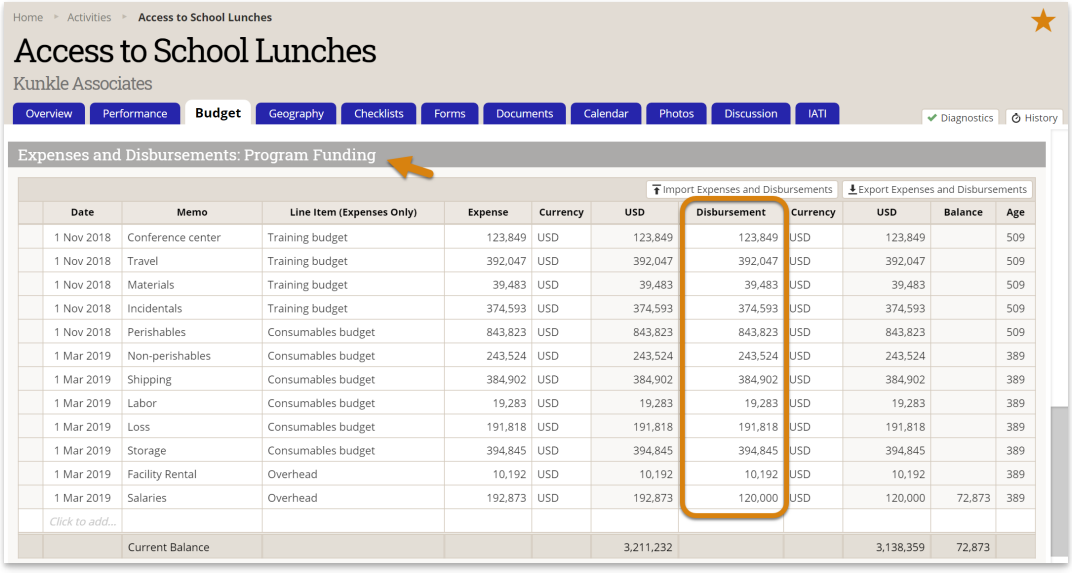

Disbursed

This **Disbursed** program statistic tile is calculated from each **Project Budget** page.

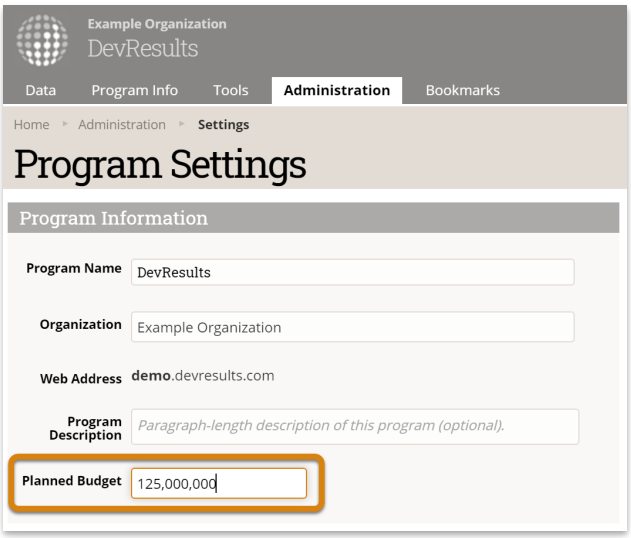

It sums the **Disbursements** column in the **Expenses and Disbursements** section, for every funding source marked as **own funding**.

Lifetime Budget

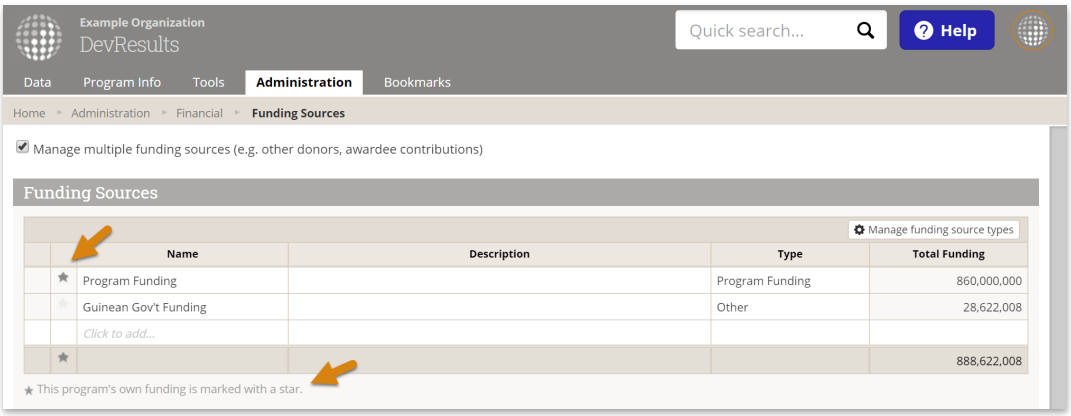

The **Lifetime Budget** value comes from the **Planned Budget** field of the **Program Settings** page. Only users with **View & Edit** permissions for **Program Settings** can edit this information. To do so, go to **Administration > Settings**.

Own Funding

To see which funding sources are marked as **own funding**, go to **Administration > Funding Sources**. Funding sources with stars are **own funding**.
