

Matrix

Last Modified on 09/08/2025 3:39 pm EDT

Matrix is a powerful query tool for creating reports. Find Matrix in any indicator's reports tab.

The display section lets you choose how to slice, dice, and analyze your data. The filter section lets you choose a subset of your data to include. You'll also find the updated display and filter options on other visualization tools, including dashboard tiles for indicator results.

Here's a quick feature guide to get you started:

1. Cross-disaggregated reports (new)
2. Group reporting periods by fiscal year (new)
3. Unlimited display disaggregations (new)
4. Include actuals and targets (improved)
5. Calculate percent of project targets and global targets (new)
6. View information incrementally or cumulatively (now including target analyses)
7. Show or hide totals for each grouping/disaggregation (new)
8. Expanded/improved filters for projects, organizations, disaggregations, geographies, and reporting periods.

The screenshot displays the DevResults Matrix tool interface. The main title is "# times an individual was trained". The interface includes a navigation bar with tabs for Definitions, Targets & Data, Reports, Forms, and Documents. The Reports tab is active, showing a data table with columns for years (2015 Q1 to 2018 Q4) and a Grand Total column. The table is organized by sector (Agriculture, Business, Technology, Health, Education, Civil society, Advocacy) and gender (Male, Female). The left sidebar contains a "Display" section with filters for Disaggregations, Reporting period, Training Type, Training Topic, Sex, and Display Values. The bottom section contains a "Filters" section with filters for Activities, Activity Statistics, and Activity Status. The table data is as follows:

	2015 Q1	2015 Q2	2015 Q3	2015 Q4	Total 2015	2016 Q1	2016 Q2	2016 Q3	2016 Q4	Total 2016	2017 Q1	2017 Q2	2017 Q3	2017 Q4	Total 2017	2018 Q1	2018 Q2	2018 Q3	2018 Q4	Total 2018	Grand Total

The filters use "OR" logic within a single filter plus "AND" logic between filters. For example, if you choose two projects from the project filter and two quarters from the reporting periods filter, you'll see data for for *both* projects, but only for the selected quarters.

Permissions required to use Matrix: view or view/edit for project overview, indicator results, indicator targets, organizations, geography, and reporting periods.
