Money

Financial and budgetary information for all projects can be viewed, organized, and analyzed on the Money page.

Create a Financial Report

You can find **Money** under the **Data** menu on any DevResults page. All project finances are displayed by default. Configure the report by using the options in the left-hand panel.

- The **display** section lets you choose how to slice, dice, and analyze your data.
- The **filter** section lets you choose a subset of your data to include.

Display

Use the Display section to decide how to arrange your data.

- **Disaggregations:** Choose how the data should be disaggregated. Arrange the disaggregations as rows/columns using the arrows next to each. Flip all the row/column selections with the arrow square in the top right.
- **Display values:** Decide which values to show ($ budgeted, $ deliverables, $ disbursed, $ expenses, $ obligated).
- **Totals:** Choose whether to show/hide each total.

Filter

Next use the **Filter** section to include data for only specific geographies, projects, statuses, mechanisms, tags, sectors, organizations, and user preferences.

2 sectors ▼

Project Tags

4 tags ▼

Partner Organizations

any partner organization ▼

Awarding Organization

any awarding organization ▼

User affiliation

any user affiliation ▼

By default, reports include data for all projects. To show data for just one project, you must filter the report to include only that project.

Save and Download

Save your report by clicking **Save**, giving it a title, and then clicking **Save** again. To find your saved reports, go to **Data > Saved Reports.**

Saving your report gives it a unique URL that you can give to anyone who has access to see that page. The URL contains an ID number, like *yoursite.devresults.com/en/dash/viewdata/money?savedreportid=**4142***. A link without an ID will take someone to the Money page, but they won't see your report.

Click on **Download** to save an Excel copy of your report.
